Introduction to Client-Server Systems & Networks

Class Assessment | Version A

Do NOT write on this booklet. Write every answer on your ANSWER SHEET.

TEST I | MULTIPLE CHOICE (12 pts)

Choose the best answer. Write only the LETTER (A, B, C, or D) on the answer sheet.

1. Multiple choice question text for client-server network component item 1?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

2. Multiple choice question text for client-server network component item 2?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

3. Multiple choice question text for client-server network component item 3?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

4. Multiple choice question text for client-server network component item 4?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

5. Multiple choice question text for client-server network component item 5?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

6. Multiple choice question text for client-server network component item 6?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

7. Multiple choice question text for client-server network component item 7?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

8. Multiple choice question text for client-server network component item 8?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

9. Multiple choice question text for client-server network component item 9?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

10. Multiple choice question text for client-server network component item 10?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

11. Multiple choice question text for client-server network component item 11?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

12. Multiple choice question text for client-server network component item 12?
A) Server device
B) Client terminal
C) Router bridge
D) Firewall gateway

TEST II | TRUE OR FALSE (8 pts)

Write T if the statement is true, or F if it is false.

13. A server can host concurrent requests reliably under normal load (Statement 1).
14. A server can host concurrent requests reliably under normal load (Statement 2).
15. A server can host concurrent requests reliably under normal load (Statement 3).
16. A server can host concurrent requests reliably under normal load (Statement 4).
17. A server can host concurrent requests reliably under normal load (Statement 5).
18. A server can host concurrent requests reliably under normal load (Statement 6).
19. A server can host concurrent requests reliably under normal load (Statement 7).
20. A server can host concurrent requests reliably under normal load (Statement 8).

TEST III | WORD BOX (5 pts)

Pick the best word from the WORD BANK. Write the corresponding letter.

A) PROTOCOL B) SOCKET C) PACKET D) PORT E) BUFFER F) THREAD

21. Word box clue description for networking term item 1:
22. Word box clue description for networking term item 2:
23. Word box clue description for networking term item 3:
24. Word box clue description for networking term item 4:
25. Word box clue description for networking term item 5:

TEST IV | FILL IN THE BLANK (5 pts)

Write the correct word or phrase to complete the statement.

26. The protocol used to securely transmit web documents is known as _____.
27. The protocol used to securely transmit web documents is known as _____.
28. The protocol used to securely transmit web documents is known as _____.
29. The protocol used to securely transmit web documents is known as _____.
30. The protocol used to securely transmit web documents is known as _____.

TEST V | IDENTIFICATION (6 pts)

Identify the concept, term, or device described.

31. Identify the system service that translates domain names into numerical IP addresses.
32. Identify the system service that translates domain names into numerical IP addresses.
33. Identify the system service that translates domain names into numerical IP addresses.
34. Identify the system service that translates domain names into numerical IP addresses.
35. Identify the system service that translates domain names into numerical IP addresses.
36. Identify the system service that translates domain names into numerical IP addresses.

TEST VI | ENUMERATION (15 pts)

List the required items. Write one answer per box.

37. Enumerate key server hardware components:
38. Enumerate key server hardware components:
39. Enumerate key server hardware components:
40. Enumerate key server hardware components:
