# Introduction to Client-Server Systems & Networks

BSIT-4 | Quiz 2 | Version A

**Do NOT write on this booklet. Write every answer on your ANSWER SHEET.**

## TEST I | MULTIPLE CHOICE (12 pts)

*Choose the best answer. Write only the LETTER (A, B, C, or D) on the answer sheet.*

**1.** What is a server?
- **A)** A device that only displays web pages
- **B)** A computer that provides services to other computers
- **C)** A type of keyboard
- **D)** A kind of network cable

**2.** Which device sends data between different networks?
- **A)** Switch
- **B)** Hub
- **C)** Router
- **D)** Cable

**3.** Which of the following is an example of a client?
- **A)** A student's laptop opening a website
- **B)** A database server
- **C)** A rack server
- **D)** A firewall

**4.** Which protocol is used to load web pages?
- **A)** SMTP
- **B)** FTP
- **C)** DNS
- **D)** HTTP

**5.** What does a UPS provide during a power outage?
- **A)** Extra storage
- **B)** Faster internet
- **C)** Temporary battery power
- **D)** More memory

**6.** Which of these is a unit of storage size?
- **A)** Hertz
- **B)** Gigabyte
- **C)** Pixel
- **D)** Watt

**7.** What does DNS do?
- **A)** Translates website names into IP addresses
- **B)** Stores emails
- **C)** Blocks viruses
- **D)** Cools the servers

**8.** Which server form factor is mounted in a 19-inch frame?
- **A)** Tower
- **B)** Blade
- **C)** Desktop
- **D)** Rack

**9.** What is the purpose of a firewall?
- **A)** Speed up the CPU
- **B)** Filter network traffic for security
- **C)** Increase disk space
- **D)** Print documents

**10.** Which component temporarily holds data the CPU is using?
- **A)** RAM
- **B)** Hard drive
- **C)** Power supply
- **D)** Monitor

**11.** Which device connects computers in the same local network?
- **A)** Modem
- **B)** Printer
- **C)** Switch
- **D)** Projector

**12.** What is a benefit of centralized management?
- **A)** Each computer needs separate updates
- **B)** Updates and backups are done from one place
- **C)** No network is needed
- **D)** Clients become servers

## TEST II | TRUE OR FALSE (8 pts)

*Write T if the statement is true, or F if it is false.*

**13.** A server can usually serve many clients at the same time.

**14.** A client always has more computing power than a server.

**15.** RAID can combine several disks to protect data or improve speed.

16. Cloud computing means data is stored only on the user's own device.

17. A backup is a spare copy of data.

18. A switch is used to connect a home network to the internet.

19. Tower servers can look similar to ordinary desktop computers.

20. HTTP is the protocol used to send email.

## TEST III | WORD BOX (5 pts)

*Pick the best word from the WORD BANK. Write only its LETTER on the answer sheet.*

**WORD BANK**

| | | |
|---|---|---|
| **A.** Cloud | **B.** Latency | **C.** Firewall |
| **D.** Switch | **E.** Cable | **F.** Bandwidth |
| **G.** Hub | **H.** Protocol | |

21. A _____ blocks unwanted traffic from entering a network.

22. Storing and using data on remote servers over the internet is called _____ computing.

23. The delay before data starts to transfer is called _____.

24. A set of rules for how devices communicate is called a _____.

25. The maximum amount of data a connection can carry in a given time is its _____.

## TEST IV | FILL IN THE BLANK (5 pts)

*Write the word that correctly completes the sentence.*

26. A _____ is a program or device that requests services from a server.

27. Servers connect to clients through a _____.

28. The brain of the computer that runs instructions is the _____.

29. The R in RAM stands for _____.

30. The short form of hard disk drive is _____.

## TEST V | IDENTIFICATION (6 pts)

*Write the exact word or term that answers the question. Use 1 to 3 words.*

31. What do you call the room or building that houses many servers and network equipment?

32. What do you call a spare copy of data kept in case the original is lost?

33. What device brings the internet signal from the provider into a home network?

34. What does the abbreviation IP stand for?

35. What type of memory detects and fixes data errors in servers? (abbreviation)

36. What do you call a small software update that fixes bugs or security holes?

## TEST VI | ENUMERATION (14 pts)

*One answer per box on the answer sheet. Each correct answer is 1 point; any order is accepted.*

37. List the 3 common server form factors. (3 pts, boxes 37.1 to 37.3)

38. List any 3 hardware parts found inside a server. (3 pts, boxes 38.1 to 38.3)

39. List any 4 services a server can provide. (4 pts, boxes 39.1 to 39.4)

40. List any 4 ways to protect a server's data or access. (4 pts, boxes 40.1 to 40.4)
